Denare Beach April 2026

This photo, April 21,2026 is taken at Creighton SK on the way to Denare Beach at the beginning of the MDS project. (Through the truck windshield – complete with a little evidence that bugs were already out. 😊)

Arriving at Denare Beach (April 21) with a dump trailer bringing scaffolding; OSB and 2x4's to build partitions for Volunteer accommodations in the Denareplex.

Minitonas MB

On June 7, 2026, heavy rainfall caused significant flooding through the Swan Valley region in Manitoba. Between June 30 and July 2, 2026, more heavy rainfall resulted in a second severe flood. MDS responded at Minitonas from late September through mid-November 2026. With volunteers focused on repairing damaged homes following flooding in June 2026.

In September at the beginning of the project at Minitonas, Helmut and Dory delivered the Saskatchewan MDS tool trailer, then in November they went back and picked it up.
